Please email complaints to support@inwx.de

When a Domain Name is Registered, certain information is collected for use on the Whois service. The Whois Service allows internet users to query a Domain Name to find out the identity and contact details of the Registrant. The public Whois service is a standard feature of Domain Name systems around the world. Please see the .aeDA's Whois Data Collection and Display Policy www.aeda.ae which sets out the guidelines on the collection, disclosure and use of Whois data.
